

在搜索栏中输入一个相关问题。例如：“篮球防守最有效的策略是什么？”或“K-pop的历史是什么？”

- Read the answer. Did it give you good information? Did it list its sources at the bottom?
阅读答案。它提供了好信息吗？它在底部列出来源了吗？

Part 3: Apply Your Tools 应用你的工具 (Yìngyòng nǐ de gōngjù)

Instruction 指示 (Zhǐshì): Reopen the diagnostic essay you just wrote. Now, use Perplexity or DeepSeek.
重新打开你刚才写的诊断文章。现在，使用Perplexity或DeepSeek。

Your task 你的任务 (Nǐ de rènwù): Find one strong reason to **SUPPORT 支持 (zhīchí)** your argument and one strong reason someone might be **AGAINST 反对 (fǎnduì)** your argument.

找到一个支持你论点的有力理由，以及一个别人可能反对你论点的有力理由。

Write your findings below 在下面写下你的发现:

- **My Argument 我的论点 (Wǒ de lùndiǎn):** [Write your main point from your essay here]
Should we have food delivery allowed at school. yes or no?

- **A Reason to Support It (from AI) 支持的理由 (来自AI) (Zhīchí de lǐyóu (láizi AI)):**
It provides better options for students

- **A Reason Against It (from AI) 反对的理由 (来自AI) (Fǎnduì de lǐyóu (láizi AI)):**
It increases inequality and feelings of exclusion among students.

Be ready to talk about what you discovered in the next class!

准备好在下节课讨论你的发现！

Chapter 2: The Power of a Single Paragraph

第二章：一个段落的力量 (Yīgè duànluò de lìliàng)

Your Goal for This Chapter 本章目标 (Běn zhāng mùbiāo): To master the PEEL method and build strong, stand-alone paragraphs that form the foundation of all your essays.

掌握PEEL方法，构建构成所有论文基础的、独立完整的强大段落。

Lesson 2.1: The PEEL Building Block

第一课：PEEL结构模块 (PEEL jiégòu mókuài)

Part 1: One Brick at a Time

一砖一瓦地建造 (Yī zhuān yī wǎ de jiànzhào)

Think back to the Master Blueprint from Chapter 1. Every great structure is built one strong brick at a time. In essay writing, the single, strong **paragraph 段落 (duànluò)** is your brick.

If you can write one excellent paragraph, you can write ten. And ten excellent paragraphs form an excellent essay.

Today, you will learn a simple but powerful formula to build perfect paragraphs every time. It's called the **PEEL method** **PEEL方法 (PEEL fāngfǎ)**.

Part 2: Deconstructing PEEL

解析PEEL (Jiěxī PEEL)

PEEL is an acronym that stands for **Point 论点 (Lùndiǎn)**, **Evidence 证据 (Zhèngjù)**, **Explanation 解释 (Jiěshì)**, **Link 连接 (Liánjiē)**.

Imagine your paragraph is a mini-essay. It needs to introduce an idea, prove it, explain it, and connect it to the bigger picture.

Let's break it down 让我们解析一下 (Ràng wǒmen jiěxī yíxià):

- **P: POINT 论点 (Lùndiǎn)**
 - This is your **topic sentence 主题句 (zhǔtí jù)**. It is the most general sentence in your paragraph.
 - It tells the reader exactly what the paragraph will prove.
 - **It must directly support your main thesis statement 论文陈述 (lùnwén chénshù).**
 - **Example 例子 (Lìzi):** "One of the main benefits of school uniforms is that they can reduce peer pressure and bullying 同伴压力和欺凌 (tóngbàn yālì hé qīlíng)."
- **E: EVIDENCE 证据 (Zhèngjù)**
 - This is your **proof 证明 (zhèngmíng)**. You cannot just state your point; you must support it.

- This can be a **fact 事实 (shìshí)**, a **statistic 数据 (shùjù)**, a **quote 引用 (yǐnyòng)** from an expert, or a logical **example 例子 (lìzi)**.
- **You must introduce your evidence and cite it if it's from a source.**
- **Example 例子 (Lìzi):** "For instance, a 2022 study from the National Education Association found that schools with uniform policies reported 30% fewer bullying incidents related to clothing."
- **E: EXPLANATION 解释 (Jiěshì)**
 - **This is the most important part of your paragraph.** This is where you show your **thinking 思考 (sīkǎo)** and **analysis 分析 (fēnxī)**.
 - You must explain *how* and *why* your evidence proves your point. Do not assume the reader makes the connection.
 - **Example 例子 (Lìzi):** "This statistic suggests that when students wear the same clothing, there are fewer opportunities for them to be judged based on their economic status or fashion choices, which are common sources of conflict."
- **L: LINK 连接 (Liánjiē)**
 - This sentence concludes your paragraph and **connects 连接 (liánjiē)** it to the main argument or to the next paragraph.
 - It creates **flow 流畅度 (liúchàng dù)** and shows how each paragraph builds your case.
 - **Example 例子 (Lìzi):** "Therefore, by reducing these superficial conflicts, uniforms can help create a school environment where students feel safer and more focused on their studies."

Part 3: See It In Action

实际应用 (Shíjì yìngyòng)

Topic 主题 (Zhǔtí): Should homework be banned? 应该禁止作业吗?

Thesis 论文论点 (Lùnwén lùndiǎn): Homework should be significantly reduced because it negatively impacts student well-being 幸福感 (xìngfú gǎn).

The PEEL Paragraph:

(P) Firstly, excessive homework infringes on crucial family time and personal relationships. **(E)** Renowned psychologist Dr. Linda Palmer asserts, "The hours spent on homework after a long school day are hours lost from meaningful family interaction, which is a key pillar of emotional development" (2023). **(E)** This expert opinion highlights that homework doesn't just take time; it steals time from the very activities that build social and emotional skills. When a student is constantly stressed about assignments, they are more likely to withdraw from family dinners or conversations, damaging their support system. **(L)** Consequently, the pressure to complete homework can ironically weaken the emotional stability that students need to succeed academically in the first place.

Label the PEEL parts in the paragraph above 在上面的段落中标注PEEL部分: (A blank space is provided for students to write P, E, E, L next to the corresponding sentences in the example)

Lesson 2.2: Building Your Own Paragraph

第二课：构建你自己的段落 (Gòujiàn nǐ zìjǐ de duànluò)

Part 1: Hands-On Workshop

实践工作坊 (Shíjiàn gōngzuò fāng)

Instructions 说明 (Shuōmíng): Let's build a PEEL paragraph together. We will use the topic from your diagnostic essay. 让我们共同构建一个PEEL段落。我们将使用你诊断文章的主题。

Step 1: Choose Your Point. 选择你的论点 (Xuǎnzé nǐ de lùndiǎn)

- **Topic 主题 (Zhǔtí):** A school rule I would change.
- **My Thesis 我的论点 (Wǒ de lùndiǎn):** [Student writes their thesis from Chapter 1 here]

- **My Point for this paragraph 本段落的论点 (Běn duànluò de lùndiǎn):** (Your first reason that supports your thesis)
Example: Allowing phone use at designated times would actually teach students valuable time management skills 时间管理技能 (shíjiān guǎnlǐ jìnéng).

Step 2: Find Your Evidence. 找到你的证据 (Zhǎodào nǐ de zhèngjù)

How can you prove your point? What kind of evidence could you use?

- ☐ A logical example 逻辑例子 (luójí lìzi)
- ☐ A quote from an article 文章引用 (wénzhāng yǐnyòng)
- ☐ Data or a statistic 数据或统计 (shùjù huò tǒngjì)
- ☐ A personal observation 个人观察 (gèrén guānchá) (use carefully!)

My Evidence 我的证据 (Wǒ de zhèngjù):

Example: For example, if students are given a 20-minute period to use their phones, they must learn to prioritize their tasks—checking messages, connecting with family, or relaxing—within a fixed timeframe 固定时间范围 (gùdìng shíjiān fànwéi).

Step 3: Write Your Explanation. 写出你的解释 (Xiěchū nǐ de jiěshì)

This is your analysis 分析 (fēnxī). Why does your evidence matter? How does it prove your point?

Sentence Starter 句子开头 (Jùzi kāitóu): *This example shows that... This is important because...*

Example: This is a direct practical lesson in budgeting a limited resource—time. This skill is far more transferable to the real world than simply following a rule without understanding its purpose.

Step 4: Create Your Link. 创建你的连接 (Chuàngjiàn nǐ de liánjiē)

Connect your paragraph back to your main argument.

Sentence Starter 句子开头 (Jùzi kāitóu): *Therefore,... This demonstrates that... As a result,...*

Example: Therefore, modifying the phone rule would transform it from a simple restriction into a tool for preparing students for the demands of the modern workforce 现代劳动力需求 (xiàndài láodònglì xūqiú).

Part 2: Put It All Together 整合所有部分 (Zhěng hé suǒyǒu bùfèn)

Now, write your complete PEEL paragraph in the space below. Use the sentences you just crafted.

现在，在下面的空白处写出你完整的PEEL段落。使用你刚才创作的句子。

(P)

(E)

(E)

(L)

Part 3: Peer Review 同伴评审 (Tóngbàn píngshěn)

Swap your paragraph with a partner. Use the checklist below to review their work. Give them one piece of **praise 表扬 (biǎoyáng)** and one **suggestion 建议 (jiànyì)**.

PEEL Checklist PEEL检查清单 (PEEL jiǎnchá qīngdān):

- ☐ **P:** Is the Point clear? Does it state the main idea of the paragraph?
论点清晰吗？它陈述了段落的主旨吗？
- ☐ **E:** Is the Evidence relevant? Does it directly support the point?
证据相关吗？它直接支持论点吗？
- ☐ **E:** Is the Explanation effective? Does it connect the evidence to the point?
解释有效吗？它将证据与论点连接起来了吗？

☐ **L:** Does the Link sentence conclude the idea or connect it to a larger topic?
连接句是否总结了观点或将其连接到更大的主题？

Praise 表扬 (Biǎoyáng): One thing I liked about your paragraph was...
我喜欢你段落的一点是...

Suggestion 建议 (Jiànyì): One thing you could make even stronger is...
你可以做得更强的一点是...

Homework: Practice Makes Perfect 作业： 熟能生巧 (Shú néng shēng qiǎo)

Task 任务 (Rènwù): Write two different PEEL paragraphs on the topics below. Use the AI tools to help you brainstorm evidence if you get stuck.

就以下主题写两个不同的PEEL段落。如果卡住了，使用AI工具来帮助你头脑风暴证据。

Paragraph 1 Topic 段落1主题: Zoos do more harm than good. 动物园弊大于利。
(P)

(E)

(E)

(L)

Paragraph 2 Topic 段落2主题: Social media platforms should have stricter age verification. 社交媒体平台应有更严格的年龄验证。

(P)

(E)

(E)

(L)

Remember 记住 (Jìzhù): You are practicing the structure. Use your AI tool as a brainstorming helper to find facts or examples, but the writing and thinking must be your own.

你正在练习结构。使用AI工具作为头脑风暴的助手来寻找事实或例子，但写作和思考必须是你自己的。

Developing your idea

How to find your Essay idea.

TASK:

1. Think of a topic you are interested in and write in in the middle of your page.
(e.g. **Social Media**)
2. Create at least 5-10 subtopic ideas about that main topic. You can use deepseek to help.
(e.g. **Mental health in social media**, **Privacy online**, **Social Apps**, **Fake news...**)
3. Select the one sub topic that is the most interesting to you.
(e.g. **I think "Fake News" is interesting**)
4. Now you have the title of your essay. **TITLE = Main Topic + Subtopic** (**Social Media and fake news**)
5. Create 5-10 paragraph ideas about the subtopic
(e.g. What can I write about fake news? - **Moderation filters**, **Motivation why?**, **Consequences of posting fake news**, **why we share fake news...**). Again, you can use Deepseek to help you find ideas.
6. Create **P.E.E.L** paragraphs for each idea.

TIP: Consider using a mindmap tool like above.

NOTION Template

1) TOPIC

(e.g. Social Media)

2) Subtopic

Create 5 Subtopics and pick the most interesting one

1) e.g. Fake News

2)

3)

4)

5)

3) Develop the idea

Pick your favourite subtopic and write down paragraph ideas, then add PEEL to each paragraph.

Subtopic

e.g. Fake News

Paragraph idea

e.g. Role of Algorithms

Example Homework:

The PEEL Paragraph Builder – Grading Rubric & Example

This assignment is a **Coursework Assessment**. It will be graded on a scale of 0–10 points and will contribute to your overall Coursework average (Weight: 20% of your final grade).

Grading Rubric

Criteria	Excellent (9–10 pts)	Good (7–8 pts)	Satisfactory (5–6 pts)	Needs Improvement (0–4 pts)
Task 1: Write PEEL Paragraphs	Both paragraphs flawlessly follow the PEEL structure. Points are clear and arguable, evidence is relevant and well-integrated, explanations are insightful, and links are strong. Language is precise and academic.	Both paragraphs correctly use the PEEL structure. All components are present, but some may be less developed (e.g., evidence could be more specific, explanation slightly vague).	Paragraphs attempt the PEEL structure but components are weak or misplaced (e.g., point is factual, explanation just restates evidence). One component may be missing.	Paragraphs do not follow the PEEL structure, are summary-based, or are incomplete. Major components missing.
Task 2: Peer Review & Reflection	Peer review feedback is specific, constructive, and demonstrates a clear understanding of the PEEL criteria. Reflection shows deep metacognitive insight into the writing process and peer learning.	Peer review is completed with relevant feedback for each PEEL component. Reflection addresses the questions but could be more detailed.	Peer review is vague or superficial. Reflection is brief and lacks depth.	Peer review is missing or irrelevant. Reflection is missing or off-topic.
Task 3: Paragraph Revision	Revision significantly improves the original paragraph. Changes directly address feedback and strengthen the argument, evidence, or analysis. The revised paragraph is polished and professional.	Revision addresses the feedback and shows clear improvement. The paragraph is stronger but may still have minor issues.	Revision is attempted but changes are minimal or do not effectively address the feedback.	Revision is missing, or the revised paragraph is weaker than the original.

Example of a Completed Homework Assignment

Task 1: Write Two PEEL Paragraphs

Paragraph 1 Topic: Zoos do more harm than good.

(P) Modern zoos, despite their conservation claims, ultimately cause more psychological and physical harm to animals than good.

(E) A 2021 study by the Animal behaviour Society found that captive elephants in accredited zoos exhibit stereotypical behaviours such as pacing and head-bobbing at a rate 300% higher than their wild counterparts, indicating severe psychological distress.

(E) These repetitive, functionless behaviours are recognised signs of poor welfare and mental suffering in captive animals, suggesting that even the most well-designed enclosures cannot meet the complex cognitive and spatial needs of intelligent species.

(L) Therefore, the ethical cost of keeping such animals in captivity for public education may outweigh the potential conservation benefits.

Paragraph 2 Topic: Social media platforms should have stricter age verification.

(P) Implementing rigorous age-verification systems on social media platforms is essential to protect minors from harmful content and predatory behaviour.

(E) According to a 2023 report by the Cyberbullying Research Center, 42% of adolescents aged 12–15 have encountered severe cyberbullying or inappropriate adult contact on platforms with weak age gates.

(E) This statistic reveals a direct link between lax verification and increased exposure to psychosocial risks during a critical developmental period, as anonymous or falsified adult profiles can easily bypass current "click-to-enter" safeguards.

(L) Consequently, robust age verification is not just a privacy measure but a necessary duty of care to create safer online spaces for young users.

Task 2: Peer Review & Reflection

Peer Review for Partner's Paragraph (Topic: Zoos):

- **Praise:** Your point is very clear and arguable. The evidence from the Animal behaviour Society is strong and recent.
- **Suggestion:** The link could connect more directly to the "education vs. harm" debate. Maybe add: "This calls into question the educational value of observing distressed animals."

Reflection:

The PEEL structure forced me to justify every part of my argument. I noticed that finding the right evidence took the most time, but it made my explanation much stronger. Reviewing my partner's work helped me see how a strong link can tie the paragraph back to a bigger thesis.

Task 3: Develop the idea

Pick your favourite subtopic and write down paragraph ideas, then add PEEL to each paragraph.

Subtopic: Fake News

Paragraph idea 1: Role of Social Media Algorithms

PEEL Ideas

P: Social media algorithms play a pivotal role in the spread of fake news by actively amplifying content that triggers strong emotional reactions, regardless of its veracity.

E: For instance, a 2023 MIT study on content virality found that false news stories are 70% more likely to be retweeted than true ones, because they often evoke surprise, fear, or disgust—emotions that algorithms are designed to prioritise for increased user engagement.

E: This demonstrates that the algorithmic design does not merely distribute information neutrally; it creates a powerful incentive structure. When a post receives rapid engagement, the platform's system interprets it as "valuable" and pushes it to larger audiences, creating a feedback loop where sensational falsehoods can outpace careful, factual reporting.

L: Therefore, the architecture of social media itself acts as an unintentional but powerful accelerator for misinformation, making the problem a systemic one rather than merely a failure of individual judgment.

Paragraph idea 2: The Financial and Political Motivation Behind Creation

PEEL Ideas

P: A primary driver of fake news creation is not misinformation but deliberate disinformation, fuelled by clear financial or political incentives.

E: Investigative reports, such as from *The New York Times* on the "Macedonian teenagers" phenomenon, revealed individuals running entire websites filled with fabricated viral news about U.S. politics, generating substantial advertising revenue through clickbait. Similarly, state-sponsored actors create and seed false narratives to sow discord, influence elections, or destabilize geopolitical rivals.

E: This evidence shows that fake news is often a calculated product, not an accidental error. The creators are adept at identifying divisive societal fissures and crafting stories that exploit them, knowing that outrage and conflict are highly marketable commodities in the digital attention economy.

L: Consequently, combating fake news requires addressing these underlying incentives, such as through stricter regulations on political ad transparency and disrupting the ad-revenue models for blatantly fraudulent sites.

Paragraph idea 3: Erosion of Public Trust in Institutions

PEEL Ideas

P: The pervasive circulation of fake news fundamentally erodes public trust in traditional institutions like journalism, science, and government.

E: The repeated exposure to contradictory and manipulative information leads to a state of "truth decay," where citizens become cynical and retreat into information silos. A landmark study by the RAND Corporation documents this correlation, showing a marked decline in trust in factual, evidence-based sources coinciding with the rise of the digital misinformation ecosystem.

E: This erosion is dangerous because a functioning democracy relies on a shared basis of facts to debate policies and hold leaders accountable. When people cannot agree on basic realities—from election results to public health measures—collective problem-solving becomes impossible, paving the way for polarisation and authoritarianism.

L: Thus, the damage inflicted by fake news extends beyond individual false beliefs to a crippling of the foundational trust necessary for societal cohesion and democratic governance.

Paragraph idea 4: The Psychological Factors in Sharing (Why We Believe & Spread It)

PEEL Ideas

P: Beyond algorithms and bad actors, the human psychology of information processing makes individuals susceptible to believing and sharing fake news.

E: Cognitive biases like confirmation bias (favoring information that fits our existing beliefs) and the illusory truth effect (repeating a statement makes it seem more true) are key factors. Research in the *Journal of Experimental Psychology* has shown that even when people encounter a correction, the initial false impression can persist in their reasoning.

E: This means that fake news is sticky because it often aligns with our pre-existing worldviews, and its simple, repetitive messaging is cognitively easier to accept than complex, nuanced truths. Sharing it can also be a social signal, reinforcing group identity and belonging.

L: Therefore, effective media literacy education must go beyond fact-checking to include training in recognising these innate cognitive biases, equipping people to be critical of their own thought processes.

Paragraph idea 5: Solutions and Countermeasures: Media Literacy and Platform Accountability

PEEL Ideas

P: A dual-pronged solution focusing on individual media literacy and robust platform accountability offers the most viable path to mitigating the fake news crisis.

E: Successful initiatives, like Finland's national media literacy program integrated into school curricula from an early age, have demonstrably increased resilience to misinformation. On the platform side, measures such as Facebook's (Meta)
