

Task 1: The "What? So What? Now What?" Journal

Think about your experience in this course so far. Write short answers to these prompts.

思考你到目前为止在这门课程中的经历。写下这些提示的简短答案。

- **What?** Describe one specific challenge, success, or "aha!" moment you had while working on an essay. **是什么？** 描述你在写文章时遇到的一个具体挑战、成功或“顿悟！”时刻。
- **So What?** Why was this moment significant? What did it reveal to you about yourself, the topic, or the writing process? **那又怎样？** 为什么这个时刻很重要？它向你揭示了关于你自己、主题或写作过程的什么？
- **Now What?** How will this realization change your approach to the next assignment or other challenges? **现在怎样？** 这个认识将如何改变你处理下一个任务或其他挑战的方法？

Task 2: Find Your Thesis

Review your answers from Task 1. Try to write **one sentence** that captures your central insight or learning. This is the draft of your reflective thesis.

回顾你在任务1中的答案。尝试写**一句话**来概括你的核心洞见或学习。这是你反思性论文陈述的草稿。

- **My Reflective Thesis** 我的反思性论文陈述: _____

Task 3: Outline a Reflection

Choose one of the essay assignments you completed this year. Create a brief outline for a reflective essay about that experience, using the structure from Lesson 3.

选择一个你今年完成的文章作业。使用第三课的结构，为关于那次经历的反思性文章创建一个简要的提纲。

- **Essay I will reflect on** 我将反思的文章: _____
- **Introduction & Thesis** 引言与论文陈述: _____
- **Body Para 1: Key Insight #1** 主体段落1: 关键洞见 #1: _____
- **Body Para 2: Key Insight #2** 主体段落2: 关键洞见 #2: _____
- **Conclusion & Future Application** 结论与未来应用: _____

Chapter 13: Advanced Research Techniques

第十三章：高级研究技巧 (Gāojí yánjiū jìqiǎo)

Your Goal for This Chapter 本章目标 (Běn zhāng mùbiāo): To move beyond basic Google searches and learn the professional strategies that will empower you to find high-quality, academic sources efficiently and effectively.

超越基本的谷歌搜索，学习专业策略，使你能够高效、有效地找到高质量的学术资源。

Lesson 13.1: Mastering the Digital Library

第一课：掌握数字图书馆 (Zhǎngwò shùzì túshūguǎn)

Part 1: Why Academic Databases?

为什么使用学术数据库？(Wèishéme shǐyòng xuéshù shùjùkù?)

Search engines like Google are great for everyday questions, but they are not curated. Academic databases are collections of **scholarly, peer-reviewed** 同行评审的 (tóngháng pínshěn de) work that has been evaluated by experts for quality and accuracy.

像谷歌这样的搜索引擎很适合日常问题，但它们不是精选的。学术数据库是**学术性的、同行评审的**作品的集合，这些作品已经由专家评估过质量和准确性。

Think of it this way 可以这样想:

- **Google:** A giant, messy warehouse. You might find a priceless painting next to a stack of old newspapers.
一个巨大、混乱的仓库。你可能会在一堆旧报纸旁边找到一幅无价的画。
- **Academic Database:** A highly organized art museum or library. Everything there has been selected for its value and relevance.
一个组织高度有序的艺术博物馆或图书馆。那里的每一样东西都是根据其价值和相关性被挑选出来的。

Part 2: Key Databases to Know

需要了解的关键数据库 (Xūyào liǎojiě de guānjiàn shùjùkù)

You will access these through your school or local library website.

你将通过你的学校或当地图书馆网站访问这些。

Database 数据库	What It's For 用途	Best For 最适合
Google Scholar 谷歌学术	A simple way to search across many scholarly sources. Good for starting out. 跨众多学术资源搜索的简单方法。适合初学者。	Finding a few key sources on a topic. "Citation chasing" (see below). 找到一个主题的一些关键资源。“引用追踪”（见下文）。
JSTOR JSTOR	A huge digital library of academic journals, books, and primary sources. 一个巨大的学术期刊、书籍和主要来源的数字图书馆。	Humanities, Social Sciences, History. Excellent for foundational research. 人文、社会科学、历史。非常适合基础研究。
Project MUSE Project MUSE	Similar to JSTOR, with a strong focus on humanities and social sciences. 与JSTOR类似，非常注重人文和社会科学。	More recent scholarship than JSTOR. High-quality journals. 比JSTOR更新的学术成果。高质量的期刊。
PubMed / MEDLINE PubMed / MEDLINE	The primary database for life sciences and biomedical topics. 生命科学和生物医学主题的主要数据库。	Medicine, Biology, Biochemistry, Nursing. 医学、生物学、生物化学、护理学。
IEEE Xplore IEEE Xplore	The main database for engineering and computer science. 工程和计算机科学的主要数据库。	Electrical Engineering, Computer Science, Electronics. 电气工程、计算机科学、电子学。

Lesson 13.2: The Researcher's Toolkit

第二课：研究者的工具包 (Yánjiū zhě de gōngjù bāo)

Part 1: Boolean Operators - Power Searching

布尔运算符——高级搜索 (Bù'ěr yùnsuàn fú——Gāojí sōusuǒ)

These are simple words (**AND, OR, NOT**) that act as commands to make your database searches incredibly precise.

这些简单的词 (**AND, OR, NOT**) 作为命令，使你的数据库搜索非常精确。

flowchart TD

A[Your Search Results]

A --> B["Narrow Search 缩小搜索 Use AND 使用 AND"]

A --> C["Broaden Search 扩大搜索 Use OR 使用 OR"]

A --> D["Exclude Terms 排除术语 Use NOT 使用 NOT"]

B --> E["social media AND anxiety Finds sources that mention BOTH terms."]

C --> F["university OR college Finds sources that mention EITHER term."]

D --> G["apple NOT fruit Finds sources about the company, excluding the food."]

Part 2: Other Search Tricks

其他搜索技巧 (Qítā sōusuǒ jìqiǎo)

- **Quotation Marks " " 引号:** Search for an exact phrase.
搜索一个确切的短语。
 - Example: **"climate change"** will find those words together, not separately.
 - 例子：“气候变化”将找到这些词在一起的结果，而不是分开的。
- **Asterisk * 星号:** The truncation symbol. Finds different endings of a word.
截断符号。查找一个词的不同结尾。
 - Example: **teen** will find teen, teens, teenage, teenager.
 - 例子：**teen**将找到 teen, teens, teenage, teenager.
- **Parentheses () 括号:** Group your search terms for complex searches.
对复杂的搜索进行搜索词分组。
 - Example: **("social media" OR Instagram) AND (anxiety OR depression)**
 - 例子：**("社交媒体" OR Instagram) AND (焦虑 OR 抑郁)**

Part 3: Citation Chasing

引用追踪 (Yǐnyòng zhuīzōng)

This is one of the most powerful research techniques.

这是最强大的研究技术之一。

- **Backward Chasing 向后追踪:** Look at the **References** or **Works Cited** list of a good source you found. Those are the sources the author used. Now you have a list of new, relevant sources to find.
查看你找到的一个好资源的**参考文献**或**引用作品**列表。那些是作者使用的资源。现在你有了一个新的、相关的资源列表去找。
- **Forward Chasing 向前追踪:** See who has **cited** the good source you found. This shows you newer research that has built upon that original source. In Google Scholar, click "Cited by" under a search result.
查看谁**引用**了你找到的好资源。这向你展示了基于该原始资源更新的研究。在谷歌学术中，点击搜索结果下的“被引用次数”。

Lesson 13.3: From Search to Source Management

第三课：从搜索到资源管理 (Cóng sōusuǒ dào zīyuán guǎnlǐ)

Part 1: The Annotated Bibliography

带注释的参考文献 (Dài zhùshì de cānkǎo wénxiàn)

An **annotated bibliography** 带注释的参考文献 is a list of your sources where each citation is followed by a short paragraph (the annotation) that describes and evaluates the source.

带注释的参考文献是你的资源列表，其中每个引用后面都有一个简短的段落（注释），描述和评估该资源。

Why do it? 为什么这么做？

- It forces you to read and understand each source critically.
它迫使你批判性地阅读和理解每个资源。
- It helps you see the conversation between your sources.
它帮助你看到资源之间的对话。
- It makes writing your literature review or essay much, much easier.
它让你写文献综述或文章变得非常、非常容易。

What to include in the annotation 注释中应包含什么:

1. **Summary 总结:** What are the main arguments? What topics are covered?
主要论点是什么？涵盖了哪些主题？
2. **Evaluation 评估:** Is it a useful source? Is it reliable? How does it compare to other sources? (Use RADAR!)
它是一个有用的资源吗？它可靠吗？与其他资源相比如何？（使用RADAR！）

3. **Reflection 反思:** How will you use this source in your essay? Does it support or contradict your thesis?
你将在文章中如何使用这个资源？它支持还是反驳你的论文？

Part 2: Citation Managers - Your Research Assistant

引文管理器——你的研究助手 (Yǐnwén guǎnlǐ qì—Nǐ de yánjiù zhùshǒu)

As you collect more sources, it becomes hard to organize them. A **citation manager 引文管理器** is software that does this for you.

当你收集更多资源时，组织它们变得困难。**引文管理器**是为你做这件事的软件。

- **What it does 它的功能:** It stores your sources, generates citations and bibliographies in any style (APA, MLA, Chicago), and can insert citations directly into your paper.
它存储你的资源，以任何格式（APA、MLA、Chicago）生成引文和参考文献，并可以直接将引文插入你的论文。
- **Popular Tools 流行工具:** **Zotero** (free and powerful), **Mendeley** (good for sciences), EndNote.
- **Recommendation 推荐:** Start with **Zotero**. It is free and excellent for university students.
从 **Zotero** 开始。它是免费的，对大学生非常出色。

Homework: The Research Apprentice

作业：研究学徒 (Yánjiù xuétú)

Task 1: Database Explorer

Go to your school's library website. Find and explore **one** of the databases mentioned in this chapter (JSTOR, Project MUSE, etc.).

到你学校的图书馆网站。找到并探索本章提到的一个数据库（JSTOR、Project MUSE等）。

- **Database Explored 探索的数据库:** _____
- **Search Query Used 使用的搜索查询:** _____
(Use at least one Boolean operator or search trick!)
(使用至少一个布尔运算符或搜索技巧！)
- **Most Interesting Source Found 找到的最有趣的资源:** _____
Title: _____

Task 2: Citation Chase

Pick a source you've already found for a current or past project.

选择一个你为当前或过去项目已经找到的资源。

- **Original Source 原始资源:** _____
- **Backward Chase 向后追踪:** List one source from its bibliography you would like to find.
从它的参考文献中列出一个你想找的资源。
- **Forward Chase 向前追踪:** Use Google Scholar to find one source that has **cited** your original source.
使用谷歌学术找到一个引用了你原始资源的资源。

Task 3: Start an Annotation

Create an entry for **one** source in the style of an annotated bibliography. Write 3-4 sentences.

以带注释的参考文献的风格为一个资源创建一个条目。写3-4句话。

- **Citation 引文:** _____
- **Annotation 注释:** _____
