Chapter 23: Capstone Work III – Synthesizing Research & The Formal Outline

第二十三章：核心成果 III - 研究与正式大纲的合成 (Héxīn chéngguǒ III - Yánjiū yǔ zhèngshì dàgāng de héchéng)

Chapter Introduction:

Over the past two chapters, you've defined your research question and gathered your sources. Now, the real synthesis begins. This chapter is about moving from a collection of notes to a structured, logical blueprint for your research paper. A strong outline is the key to a clear, persuasive, and well-organized argument.

在之前的两个章节中，你们定义了研究问题并收集了资料。现在，真正的合成开始了。本章旨在将零散的笔记转化为研究论文的结构化、逻辑化的蓝图。一个强大的提纲是写出清晰、有说服力且组织良好的论文的关键。

Lesson 23.1: From Notes to Structure (40 mins)

第23.1课：从笔记到结构 (Cóng bǐjì dào jiégòu)

Goal: To organize research notes into thematic groups that will form the main points of the paper.

目标： 将研究笔记组织成主题组，这些主题组将构成论文的要點。

Part A: The Sorting Process

整理过程 (Zhěnglǐ guòchéng)

Your digital or physical notecards are your raw material. Your first task is to sort them into piles based on recurring themes, ideas, or arguments that support your thesis. Don't force it; let the categories emerge from your research.

你的数字或实体笔记卡是你的原材料。你的第一个任务是根据重复出现的主题、想法或支持你论点的论证将它们分类。不要强求；让类别从你的研究中自然浮现。

- *Tip:* Use different coloured highlighters or digital tags to colour-code your notes by theme.
- **提示：** 使用不同颜色的荧光笔或数字标签按主题为你的笔记进行颜色编码。

Part B: Identifying Main Arguments

识别主要论点 (Shíbié zhǔyào lùndiǎn)

Look at your sorted piles. Each major thematic group has the potential to become a main point (a Roman Numeral in your outline). Ask yourself:

看看你整理好的分类。每个主要的主题组都有可能成为一个要点（你大纲中的罗马数字）。问自己：

- Does this group of evidence directly support my thesis?
- 这组证据是否直接支持我的论点？
- Is this point substantial enough to be a major section of my paper?
- 这个要点是否足够重要，可以成为论文的一个主要部分？
- Try to draft a topic sentence for each pile—a claim that this group of evidence proves.
- 尝试为每一组草拟一个主题句——即这组证据所能证明的一个主张。

Task 1 任务一 (Rènwù yī) (10 mins):

Take your research notes from Chapter 22. Actively sort them into 3-4 thematic groups. For each group, write a one-sentence description of what that group is about (e.g., "Economic benefits of remote work," "Social challenges of remote work").

拿出你在第22章的研究笔记。主动将它们分为3-4个主题组。为每个组写一句话描述该组的内容（例如，“远程工作的经济效益”、“远程工作的社会挑战”）。

Lesson 23.2: Building the Formal Outline (40 mins)

第23.2课：构建正式大纲 (Gòujiàn zhèngshì dàgāng)

Goal: To construct a detailed formal outline using standard alphanumeric formatting.

目标：使用标准的字母数字格式构建一个详细的正式大纲。

Part A: The Rules of the Road

规则指引 (Guīzé zhīyǐn)

A formal outline uses a specific structure to show the hierarchy of your ideas:

正式大纲使用特定的结构来显示你观点的层次结构：

- **I, II, III:** Main Points (Body Paragraphs/Sections) 要点 (Yàodiǎn)
- **A, B, C:** Sub-points or specific claims within a main point 分论点 (Fēn lùndiǎn)
- **1, 2, 3:** Evidence, examples, and data (e.g., a specific statistic or quote) 证据 (Zhèngjù)
- **a, b, c:** Further analysis or explanation of that evidence 分析 (Fēnxī)

Principles to Follow:需遵循的原则：

- **Coordination 并列关系 (Bíngliè guānxi):** Items at the same level (all the 'A's under a 'I') must be of equal importance.
- **Subordination 从属关系 (Cóngshǔ guānxi):** Information at each level must be more specific than the level above it. Your 'A' explains your 'I'; your '1' provides evidence for your 'A'.

Part B: Integrating Your Sources

整合资料源 (Zhěnghé zīliào yuán)

Within your outline, note which source provides evidence for each point. This makes drafting infinitely easier.

在你的大纲中，注明哪个资料源为每个要点提供了证据。这会让起草论文变得无比容易。

- *Example:* Under II.A.2, you might write: "Data on songbird population decline in North America - (National Audubon Society, 2023)."
- *例子：*在 II.A.2 下面，你可以写：“关于北美鸣禽数量下降的数据 - (National Audubon Society, 2023)。”

Task 2 任务二

(Rènwù èr)

Using your thematic groups from Lesson 23.1, build the skeleton of your formal outline. Draft your main points as complete sentences (I, II, III). Under each, add 2-3 sub-points (A, B, C) that state what you will argue in that section.

使用你在第23.1课整理的主题组，构建你的正式大纲的框架。将你的要点草拟为完整的句子 (I, II, III)。在每个要点下，添加2-3个分论点 (A, B, C)，说明你将在该部分论证的内容。

Lesson 23.3: The Roadmap to Your First Draft (40 mins)

第23.3课：通往初稿的路线图 (Tōngwǎng chūgǎo de lùxiàntú)

Goal: To refine the outline and use it to begin drafting the paper's introduction.

目标：完善大纲，并利用它开始起草论文的引言。

Part A: The Reverse Outline Check

反向大纲检查 (Fǎnxiàng dàgāng jiǎnchá)

A powerful way to test your outline is to read *only* the points labelled I, II, and III (your main topic sentences). Do they flow logically from one to the next? Do they, together, provide a complete and compelling argument for your thesis? If not, rearrange or reword them.

测试你的大纲的一个有效方法是只阅读标有 I, II 和 III 的要点 (你的主要主题句)。它们之间逻辑流畅吗? 它们是否共同为你的论点提供了一个完整且令人信服的论证? 如果没有, 重新排列或改写它们。

Part B: Drafting from the Outline - The Introduction

根据大纲起草 - 引言 (Gēnjù dàgāng qǐcǎo - Yǐnyán)

Your outline isn't just for the body. It informs your entire paper. Use it to draft your introduction.

你的大纲不仅仅适用于正文。它为你的整篇论文提供信息。用它来起草你的引言。

1. **Hook 引子 (Yīnzi):** Start with a compelling fact, question, or anecdote from your research.
2. **Background 背景信息 (Bèijīng xīnxi):** Provide context necessary to understand the argument (drawn from your initial research).
3. **Thesis Statement 论点陈述 (Lùndiǎn chénnshù):** Insert your refined thesis from Chapter 22. It is the engine of your paper.
4. **Roadmap 路线图 (Lùxiàntú):** Briefly Summarise the main points (I, II, III) that you will use to prove your thesis. *Example: "This paper will first analyze X, before arguing Y, and finally proposing Z."*

Task 3 任务三 (Rènwù sān) (15 mins):

Perform a "reverse outline check" on your partner's outline. Provide feedback on the logical flow of their main points. Then, write a first draft of your paper's introduction, including a clear roadmap sentence.

对你伙伴的大纲进行“反向大纲检查”。就他们要点的逻辑流畅性提供反馈。然后, 撰写你论文引言的第一稿, 包括一个清晰的路线图句子。

Chapter 23: Tasks & Homework

第23章: 任务与作业 (Rènwù yǔ zuòyè)

In-Class Tasks 课堂任务 (Kètáng rènwù):

- **Task 1:** Thematic sorting of research notes. 研究笔记的主题分类。
- **Task 2:** Construction of a detailed alphanumeric outline skeleton. 构建详细的字母数字大纲框架。
- **Task 3:** Peer review of outlines and drafting of the introduction. 同伴互评大纲并起草引言。

Homework 作业 (Zuòyè):

1. **Complete Your Formal Outline 完成正式大纲 (Wánchéng zhèngshì dàgāng):** Flesh out your outline from class into its full, detailed form. Every sub-point (A, B, C) must have at least two pieces of supporting evidence (1, 2) noted beneath it, with the source identified in parentheses.
将你在课堂上完成的大纲充实为完整、详细的形式。每个分论点 (A, B, C) 下面必须至少有两个支持证据 (1, 2), 并在括号中注明来源。
2. **Submit Your Blueprint 提交你的蓝图 (Tíjiāo nǐ de lántú):** Your completed formal outline is your primary deliverable for this chapter.
你完成的正式大纲是本章的主要交付成果。
