

Task 3: Write a Conversational Paragraph

Choose a topic you have an opinion on. Write one paragraph that uses the full "They Say / I Say / Because / Therefore" structure from the worked example.

选择一个你有观点的主题。写一个段落，使用完整示例中的完整“他们说/我说/因为/因此”结构。

- **My Topic 我的主题:** _____
- **My Paragraph 我的段落:**
 - **They Say:** _____
 - **I Say:** _____
 - **Because:** _____
 - **Therefore:** _____

Chapter 19: Discipline-Specific Writing

第十九章：学科特定写作 (Xuékē tèdìng xiězuò)

Your Goal for This Chapter 本章目标 (Běn zhāng mùbiāo): To understand that academic writing has different "dialects" depending on the field of study. You will learn to identify and adapt to the key conventions of writing in the Sciences, Social Sciences, and Humanities.

理解学术写作根据研究领域有不同的“方言”。你将学习识别并适应科学、社会科学和人文学科写作的关键惯例。

Lesson 19.1: The Three Academic Cultures

第一课：三种学术文化 (Sān zhǒng xuéshù wénhuà)

While all academic writing values evidence and logic, different disciplines have different ways of arguing, presenting evidence, and structuring documents.

虽然所有学术写作都重视证据和逻辑，但不同学科有不同的论证、呈现证据和构建文档的方式。

Part 1: The Sciences (e.g., Biology, Physics, Engineering)

科学 (例如：生物学、物理学、工程学)

- **Primary Goal 主要目标:** To discover and report objective facts about the natural world. To prove a hypothesis.
发现和报告关于自然世界的客观事实。证明一个假设。
- **Key Values 核心价值: Objectivity 客观性,** reproducibility, precision, conciseness.
客观性、可重复性、精确性、简洁性。
- **Common Structure 常见结构: IMRaD:** Introduction, **Methods, Results,** and Discussion.
IMRaD: 引言、方法、结果和讨论。
- **Tone 语气:** Impersonal, neutral, and direct. Avoids personal opinion.
客观的、中立的、直接的。避免个人观点。
- **Evidence 证据:** Quantitative data, statistics, experimental results. Presented in figures, tables, and graphs.
定量数据、统计数据、实验结果。以图表形式呈现。

Example Sentence 例句:

- "The results indicate a **statistically significant** ($p < .05$) **correlation** between variable X and variable Y."
“结果表明变量X和变量Y之间存在**统计学上显著的** ($p < .05$) **相关性**。”

Part 2: The Social Sciences (e.g., Psychology, Sociology, Economics)

社会科学 (例如：心理学、社会学、经济学)

- **Primary Goal 主要目标:** To understand human behaviour, societies, and systems. To analyze patterns and causes.
理解人类行为、社会和社会系统。分析模式和原因。
- **Key Values 核心价值: Rigor 严谨性,** clarity, interpretation of data, connection to theory.
严谨性、清晰度、数据解释、与理论的联系。
- **Common Structure 常见结构:** Often uses IMRaD, but the **Discussion** section is heavier, focusing on interpreting results in the context of existing theories.
通常使用IMRaD, 但讨论部分分量更重, 侧重于在现有理论背景下解释结果。
- **Tone 语气:** Analytical and objective, but may use more interpretive language than the sciences.
分析性和客观性, 但可能比科学使用更多解释性语言。
- **Evidence 证据:** Mix of quantitative data (surveys, statistics) and qualitative data (interviews, case studies).
定量数据 (调查、统计) 和定性数据 (访谈、案例研究) 的结合。

Example Sentence 例句:

- "This study **applies** Bandura's theory of social learning to **analyze** the **impact** of media models on adolescent behaviour, **suggesting** a need for **further research** into protective factors."
“本研究**应用**班杜拉的社会学习理论来**分析**媒体模型对青少年行为的影响, **表明**需要**进一步研究**保护性因素。”

Part 3: The Humanities (e.g., History, Literature, Philosophy)

人文学科 (例如：历史、文学、哲学)

- **Primary Goal 主要目标:** To interpret texts, events, and ideas. To construct a persuasive argument based on evidence and logical analysis.
解释文本、事件和思想。基于证据和逻辑分析构建有说服力的论证。
- **Key Values 核心价值: Interpretation 阐释,** persuasion, nuance, critical thinking, originality of analysis.
阐释、说服力、细微差别、批判性思维、分析的原发性。
- **Common Structure 常见结构:** Often a **thesis-driven essay**. Less rigid than IMRaD. Structure is built around the logic of the argument.
通常是**论文驱动的文章**。不如IMRaD严格。结构围绕论证的逻辑构建。
- **Tone 语气:** Can be more personal and authoritative ("I will argue..."). Values elegant prose and a strong authorial voice.
可以更个人化和权威 (“我将论证...”)。重视优雅的散文和强烈的作者声音。
- **Evidence 证据:** Quotations from primary sources (the text, historical document), close reading, and logical reasoning.
来自主要来源 (文本、历史文献) 的引用、细读和逻辑推理。

Example Sentence 例句:

- "By **close reading** the **imagery** of decay in Eliot's poem, I **argue** that the work does not merely describe a crisis of faith, but **enacts** it formally through its **fragmented** structure."
“通过**细读**艾略特诗中腐朽的**意象**, 我**论证**该作品不仅仅描述了一场信仰危机, 而且通过其**碎片化**的结构在形式上**呈现**了它。”

Lesson 19.2: Decoding Disciplinary Conventions

第二课：解读学科惯例 (Jiědú xuékē guànlì)

Part 1: Citation Styles 引用风格 (Yǐnyòng fēnggé)

The way you cite sources is a quick indicator of the discipline.

你引用来源的方式是学科的快速指标。

- **APA (American Psychological Association) 美国心理学会格式:** Used in Social Sciences (Psychology, Education). Emphasises author and date (**Smith, 2023**), highlighting the timeliness of the research.
用于社会科学 (心理学、教育学)。强调作者和日期(Smith, 2023), 突出研究的时效性。

- **MLA (Modern Language Association) 现代语言协会格式:** Used in Humanities (Literature, Languages). Emphasises author and page number (**Smith 45**),方便读者查找原文。
用于人文学科（文学、语言）。强调作者和页码(Smith 45)，方便读者查找原文。
- **Chicago/Turabian 芝加哥/图拉宾格式:** Used in History and sometimes Humanities. Often uses footnotes¹ for citations. 用于历史学，有时也用于人文学科。通常使用脚注¹进行引用。
- **Vancouver/AMA 温哥华/美国医学会格式:** Used in Medical and Physical Sciences. Uses superscript numbers¹ that correspond to a numbered reference list. 用于医学和物理科学。使用上标数字¹，对应编号的参考文献列表。

Part 2: Voice and Persona 声音与人格 (Shēngyīn yǔ réngé)

- **Sciences 科学: Passive voice** is often used to create objectivity and focus on the action, not the researcher. ("The solution **was heated**" rather than "**I heated** the solution.").
被动语态通常用于创造客观性并聚焦于动作，而不是研究者。（“溶液**被加热**”而不是“**我加热了**溶液。”）。
- **Humanities 人文学科: Active voice** and first-person ("**I argue**," "**This essay demonstrates**") are common and acceptable to show your authoritative interpretation.
主动语态和第一人称（“**我论证**,” “**本文表明**”）很常见且可接受，以显示你权威的阐释。
- **Social Sciences 社会科学:** Often a **middle ground**. May use first person to describe the research process but passive voice for methods. ("**I designed** a survey. The data **were analyzed** using SPSS.").
通常是**中间立场**。可能使用第一人称描述研究过程，但使用方法时使用被动语态。（“**我设计**了一项调查。数据**使用SPSS进行了分析**。”）。

Lesson 19.3: Becoming a Flexible Writer

第三课：成为灵活的作者 (Chéngwéi línghuó de zuòzhě)

Your task is not to memorize every rule, but to learn to **analyze the writing in your field**.
你的任务不是记住每一条规则，而是学会**分析你所在领域的写作**。

Part 1: How to Analyze a Journal Article

如何分析期刊文章 (Rúhé fēnxī qīkān wénzhāng)

When you are assigned to write in a new discipline, find a key journal in that field and ask:
当你被要求写一个新学科的文章时，找到该领域的关键期刊并问：

1. **Structure 结构:** How is the article organized? Does it use IMRaD or something else?
文章是如何组织的？它使用IMRaD还是其他结构？
2. **Voice 声音:** Does the author use "I" or "we"? Is the language personal or impersonal?
作者使用“我”或“我们”吗？语言是个人的还是客观的？
3. **Evidence 证据:** What kind of evidence is used? Data? Quotes? Logical arguments? How is it presented?
使用了什么类型的证据？数据？引用？逻辑论证？它是如何呈现的？
4. **Citations 引用:** What citation style is used? (APA, MLA, Chicago?).
使用了什么引文格式？（APA、MLA、Chicago？）。

Homework: The Discipline Detective

作业：学科侦探 (Xuékē zhěntàn)

Task 1: Article Analysis

Find one journal article from a field you are interested in (e.g., Psychology, Computer Science, History). Analyze it using the questions above.

找一个你感兴趣领域（例如：心理学、计算机科学、历史）的期刊文章。用上述问题分析它。

- **Journal/Field 期刊/领域:** _____
- **1. Structure 结构:** _____
